EDUCATION

University of Lucknow <i>B.Tech in Computer Science and Engineering (AI)</i>	Lucknow, UP <i>Oct. 2023 – Present</i>
Einstein Public School <i>Intermediate (Class XII) 86.8%</i>	Pratapgarh, UP <i>Apr. 2021 – July 2022</i>
Einstein Public School <i>High School (Class X) 90%</i>	Pratapgarh, UP <i>Apr. 2019 – July 2020</i>

EXPERIENCE

Data Science Intern <i>NIELIT</i>	June 2025 – July 2025 <i>Remote</i>
- Led comprehensive data preprocessing, advanced feature engineering, and rigorous exploratory data analysis (EDA) across 5+ complex, real-world datasets utilizing NumPy, Pandas, and Matplotlib. - Engineered and critically evaluated 6 foundational machine learning algorithms—including Support Vector Machines, Random Forests, and K-Nearest Neighbors—utilizing the Scikit-learn framework. - Architected and deployed 10+ interactive data visualizations to extract actionable business insights, identify nuanced underlying trends, and significantly optimize feature selection and model tuning strategies.	

PROJECTS

Your-Own-AI (VectorDB) <i>C++, HNSW, KD-Tree, RAG, Ollama, cpp-httplib</i>	
- Engineered a high-performance vector database in modern C++, implementing HNSW, KD-Tree, and Brute-Force search algorithms across diverse distance metrics with an integrated, automated benchmarking suite. - Seamlessly integrated a localized RAG pipeline leveraging Ollama, featuring sophisticated document chunking, nomic-embed-text embeddings, and context retrieval optimized for Llama 3.2 (1B) inference.	
AI Resume Screener <i>Python, Groq, Pydantic, Streamlit</i>	Live Demo
- Engineered a sophisticated LLM-driven pipeline utilizing Streamlit and the Groq API to parse complex resumes into highly structured Pydantic schemas for automated, intelligent candidate ranking. - Built for enterprise resilience, featuring exponential retry-with-backoff for API interactions, hash-based document caching, and isolated error handling, culminating in an intuitive UI delineating skill alignments.	
Home Price Suite <i>Python, Scikit-learn, Flask, Docker, AWS, CI/CD</i>	Live Demo
- Architected an end-to-end machine learning ecosystem, delivering a production-grade web application complete with a Flask REST API, Nginx reverse proxy, and a responsive frontend. - The core inference engine utilizes a Scikit-learn Linear Regression model, rigorously optimized through advanced feature engineering, outlier mitigation, and K-Fold cross-validation techniques.	

TECHNICAL SKILLS

Languages: Python, C++, HTML/CSS, JavaScript
AI/ML & GenAI: Scikit-learn, RAG, Ollama, Groq, Vector DBs
Frameworks & Tools: Flask, Streamlit, Pydantic, Pandas, NumPy, Docker, Nginx, AWS

CERTIFICATIONS

AWS Training & Certification - Fundamentals of ML & AI	May 2026 – June 2026
Samsung Innovation Campus - Artificial Intelligence	Oct. 2025 – Dec. 2025
